

RAM SIDE STEP ESTRIBO RAM MARCHEPIED DE RAM

1X A B 1X

REGULAR

Lubricate the riv-nut tool using fresh motor oil for lubricant and clean rivnut threads with brake cleaner after installed on vehicle.

Apply 25Nm +/-1.5Nm of torque to the riv-nut tool. If a torque wrench is not available rotate the riv-nut tool for 3.5 turns +/- 0.25 turn to ensure riv-nut is fully collapsed.

Important: Upon installation riv-nut flange should be flat and tight to the sheet metal. Riv-nut should not have any slack.

Caution: Use riv-nut tool pt# 82212003 to properly install riv-nuts. Do not use any other method to collapse riv-nuts.

1 Re-lubricate the riv-nut tool before installing every rivnut.

FRONT OF VEHICLE
DEVANT DU VEHICULE
PARTE DELANTERADEL VEHICULO
